

G.H. Clark Jr. Inc. offers new Crystal Archi-Tech™ windows

By RICK BECKRICH
Calvert Independent Staff Writer

“Whether you are remodeling, renovating or building a new home,” said Gil Clark, “this window will change the way you see the world. We are now Southern Maryland’s sole provider of these new Crystal Archi-Tech™ vinyl windows that deliver unmatched beauty and state-of-the-art performance for energy savings, reduced maintenance and a more comfortable home.”

Clark, the owner of G.H. Clark Jr. Inc., explained, “Our insulated glass windows use the latest technology, low e-coatings and an Argon/Krypton gas blend filling, to ensure the best possible insulation performance—a full 35 percent more efficient than Energy Star requirements.”

“Equally important, each window is custom-made to fit your current window openings precisely. They are easier to install because they require no additional wall construction, compared to stock windows found at the big box stores, and we pass this labor savings on to you,” the Prince Frederick contractor said.

“These windows are made in the U.S.A. We actually visited the factory in New York last week, and Terry filmed a good part of it to put up on our web site. It gives you a good feeling to see the care that goes into a product you plan to offer to your customers.”

“We’ve been installing windows for more than 20 years, and we wanted a great window, not just a good window for our customers. I want to say these are really quality built products. The best I’ve ever seen,” Clark paused. “No wonder they come with an Energy Savings Guarantee... that’s right, they actually offer a guarantee that you will save at least 35 percent in fuel used, and

Harold Kaye, senior vice president of business development for Crystal Window and Door Systems, talks about the window’s unique features.

“The ultimate choice for beauty, comfort and energy efficiency,” Clark summarized. “Did I mention that the that these windows have a U-value of 0.26? That’s 13 percent better than the new stimulus package will require. Our windows help to pay for themselves through lower energy costs, freedom from maintenance and increased property values.”

“Plus,” Clark said with a smile, “our G.H. Clark Lifetime Limited

Warranty for both labor and material delivers the peace-of-mind you have come to look for from an industry leader. Oh, and don’t worry, you don’t have to wait until spring—we do install windows all winter long.”

You can view Clark’s trip to the Crystal Window Plant in New York on their web site at www.ghclark.com.

A U-Value of 0.26
Significantly lower and better than
ENERGY STAR requirements.

Virtually No Edge Conductivity
Result of unique spacer design.
Argon/Krypton Blend Fill IGU
Advanced formula reduces
glass surface heat transmittance.

Inserted Foam Insulation
Further enhances window
thermal performance.

Both the sash and frame are fusion welded at the corners,
forming a molecular bonded one piece permanent frame
that is stronger than the actual vinyl. This is then
cleaned on a computer controlled corner cleaner to
assure perfect aesthetics.
